NIST CSF 2.0

CHECKLIST PART 1 GOVERN(GV)

	NIST CSF 2.0 Audit Checklist	
Function	GOVERN (GV): The organization's cybersecurity risk expectations, and policy are established, communi	
Category	Organizational Context (GV.OC): The circumstances - expectations, dependencies, and legal, regulatory, and co surrounding the organization's cybersecurity risk mana	— mission, stakeholder ontractual requirements —
Subcategory	Audit Questionnaire	Compliance Status
GV.OC-01: The organizational mission is understood and informs cybersecurity risk management	 Does the organization have a documented and communicated mission statement that clearly articulates the organization's purpose and strategic objectives? Have the organization's key stakeholders (e.g., executive leadership, board of directors, department 	
SIMITERO	 heads) been engaged to ensure a shared understanding of the organizational mission? 3. Has the organization assessed how its mission and strategic objectives could be impacted by cybersecurity risks and threats? 4. Are the organization's cybersecurity risk management 	
MOS	policies, processes, and controls aligned with and designed to support the achievement of the organizational mission? 5. Do the organization's cybersecurity risk management activities (e.g., risk assessments, control implementation, monitoring) take the organizational mission into account when prioritizing and addressing	
	risks? 6. Are cybersecurity roles and responsibilities defined in a way that ensures the organization's mission is considered when making risk-based decisions?	
	7. Does the organization periodically review and update its cybersecurity risk management approach to ensure it remains aligned with the evolving organizational mission and strategic priorities?	
external stakeholders are understood, and their needs and expectations	 Has the organization identified and documented its internal and external stakeholders? Has the organization assessed the needs, expectations, and concerns of these stakeholders 	
regarding cybersecurity risk management are understood and considered	regarding cybersecurity? 3. Are the identified stakeholders and their cybersecurity-related needs and expectations communicated and understood throughout the organization?	
	Does the organization have a process in place to regularly engage with stakeholders to understand any changes or new cybersecurity-related needs and expectations?	

-	, , , , , , , , , , , , , , , , , , ,
	 5. Are the organization's cybersecurity risk management policies, processes, and controls designed to address the identified stakeholder needs and expectations? 6. Are there examples of how the organization has incorporated stakeholder feedback and input into its cybersecurity risk management approach? 7. Does the organization have a mechanism to monitor and address any gaps or misalignments between stakeholder needs and the organization's cybersecurity risk management activities?
GV.OC-03: Legal,	Has the organization identified and documented all
regulatory, and	relevant legal, regulatory, and contractual
contractual requirements	requirements that impact its cybersecurity practices?
regarding cybersecurity —	2. Does the organization have a process in place to
including privacy and civil	regularly review and update its understanding of
liberties obligations — are	applicable cybersecurity-related laws, regulations,
understood and managed	and contractual obligations?
	3. Are the identified legal, regulatory, and contractual
	requirements communicated to relevant stakeholders
THISTRY OF	throughout the organization?
MOS	4. Has the organization assessed the potential impacts
· accusity	and risks associated with non-compliance with these requirements?
	5. Are the organization's cybersecurity risk management
	policies, processes, and controls designed to ensure
	compliance with the identified legal, regulatory, and
	contractual requirements?
	6. Does the organization have a mechanism to monitor
	and report on its compliance with cybersecurity-
	related legal, regulatory, and contractual
	requirements?
	7. Are there any examples of how the organization has
	adapted its cybersecurity risk management approach
	to address changes in legal, regulatory, or contractual
	requirements?
GV.OC-04: Critical	Has the organization identified and documented its
objectives, capabilities,	critical objectives, capabilities, and services that are
and services that	essential for stakeholders (both internal and
stakeholders depend on	external)?
or expect from the	2. Are the dependencies and relationships between
organization are understood and	these critical objectives, capabilities, and services understood, including any interdependencies or
communicated	external dependencies?
Johnnanioated	3. Has the organization assessed the potential impacts
	on stakeholders if these critical objectives,
	capabilities, and services are disrupted or
	compromised?
	4. Are the organization's cybersecurity risk management
	policies, processes, and controls designed to protect
	the critical objectives, capabilities, and services

GV.OC-05: Outcomes, capabilities, and services that the organization depends on are understood and communicated	proportionate to their importance and the associated risks? 5. Does the organization monitor and review the status and security of the critical objectives, capabilities, and services on a regular basis? 6. Are there processes in place to manage changes or disruptions to the critical objectives, capabilities, and services, including incident response and recovery plans? 7. Are the organization's key stakeholders (e.g., leadership, service owners) aware of and engaged in the management of the critical objectives, capabilities, and services? 1. Has the organization identified and documented the critical outcomes, capabilities, and services that it depends on to achieve its mission and objectives? 2. Are the dependencies and relationships between these critical outcomes, capabilities, and services understood, including any interdependencies or external dependencies? 3. Has the organization assessed the cybersecurity risks associated with these critical outcomes, capabilities, and services, including the potential impacts if they are disrupted or compromised? 4. Are the cybersecurity controls and risk management activities designed to protect the organization's critical outcomes, capabilities, and services proportionate to their importance and the associated risks? 5. Does the organization monitor and review the status and security of the critical outcomes, capabilities, and services on a regular basis? 6. Are there processes in place to manage changes or disruptions to the critical outcomes, capabilities, and services, including incident response and recovery plans? 7. Are the organization's key stakeholders (e.g., leadership, service owners) aware of and engaged in the management of the critical outcomes, capabilities, and services, including and the critical outcomes, capabilities, and services on a regular basis?
Category	Risk Management Strategy (GV.RM): The organization's priorities, constraints, risk tolerance and appetite statements, and assumptions are established, communicated, and used to support operational risk decisions

Subcategory	Audit Questionnaire	Compliance Status
GV.RM-01: Risk	Has the organization defined clear and measurable	
management objectives	cybersecurity risk management objectives?	
are established and	2. Were these objectives developed in collaboration with	
agreed to by	key stakeholders, such as executive leadership,	
organizational	business units, and IT/security teams?	
stakeholders	3. Do the risk management objectives align with the	
	organization's overall strategic goals and priorities?	
	4. Are the risk management objectives communicated	
MINISTRYON	and understood across the organization?5. Are the risk management objectives regularly	
MOS		
* SECRETA	reviewed and updated to ensure they remain relevant	
	and appropriate?	
	6. Are the risk management objectives used to guide the	
	development and implementation of the	
	organization's cybersecurity risk management	
	program?	
	7. Does the organization have a process in place to	
	measure and report on the achievement of the risk	
CV PM 02: Pick apportite	management objectives?	
GV.RM-02: Risk appetite and risk tolerance	Has the organization defined and documented its cybersecurity risk appetite and risk tolerance	
statements are	statements?	
established,	Were these statements developed in collaboration	
communicated, and	with key stakeholders, such as executive leadership,	
maintained	business units, and IT/security teams?	
	3. Do the risk appetite and tolerance statements align	
	with the organization's strategic goals, risk	
	management objectives, and overall risk management	
	approach?	
	4. Are the risk appetite and tolerance statements	
	communicated and understood across the	
	organization?	
	5. Does the organization have a process in place to	
	review and update the risk appetite and tolerance	
	statements on a regular basis to ensure they remain	
	relevant and appropriate?	
	6. Are the risk appetite and tolerance statements used	
	to guide decision-making and risk management	
	activities throughout the organization?	
	7. Are there examples of how the organization has	
	applied the risk appetite and tolerance statements to	
	address specific risks or risk scenarios?	
GV.RM-03: Cybersecurity	Has the organization integrated its cybersecurity risk	
risk management	management activities and outcomes into the	
activities and outcomes	enterprise-wide risk management processes?	
are included in enterprise	Are cybersecurity risk management strategies and	
risk management	treatment plans coordinated with the organization's	
processes	overall enterprise risk management approach?	

	Are cybersecurity risk management responsibilities
	and accountabilities defined within the enterprise risk
	management framework?
	4. Does the organization's enterprise risk management
	reporting and governance processes include
	information on cybersecurity risks and risk
	management activities?
	5. Does the organization periodically review the
	integration of cybersecurity risk management within
	the enterprise risk management processes to identify
OV DM 04: Chrotosia	any gaps or areas for improvement?
GV.RM-04: Strategic	Has the organization defined and documented its
direction that describes	strategic direction for cybersecurity risk response
appropriate risk response	options?
options is established	Does the strategic direction consider factors such as
and communicated	the organization's risk appetite, tolerance, and
	available resources?
	3. Are the risk response options (e.g., accept, mitigate,
	transfer, avoid) clearly described and communicated
	to relevant stakeholders?
	4. Are the criteria and decision-making processes for
	selecting appropriate risk response options defined
	and understood across the organization?
	5. Are the risk response options aligned with the
	organization's overall cybersecurity risk management
	strategy and enterprise risk management approach?
	6. Does the organization have a mechanism to monitor
	the effectiveness of the implemented risk response
	options and make adjustments as needed?
GV.RM-05: Lines of	Has the organization established and documented
communication across	clear lines of communication for sharing information
the organization are	about cybersecurity risks across the organization?
established for	Do these communication channels include both
cybersecurity risks,	vertical (e.g., from leadership to operational teams)
including risks from	and horizontal (e.g., across business units, functions)
suppliers and other third	information flows?
1	
parties	·
	and escalating cybersecurity risks, including risks
	from suppliers and other third parties, defined and
MINISTRYON	understood?
MNS	4. Are the communication processes and protocols for
TELEGRALIA.	sharing information about cybersecurity risks
	documented and communicated to relevant
	stakeholders?
	5. Does the organization have a mechanism to ensure
	timely and effective communication of cybersecurity
	risks to the appropriate decision-makers and
	stakeholders?
	GUNGHOUGIS;

Subcategory	Audit Questionnaire	Compliance Status
Category	Roles, Responsibilities, and Authorities (GV.RR): responsibilities, and authorities to foster accountability, pand continuous improvement are established an	performance assessment,
GV.RM-07: Strategic opportunities (i.e., positive risks) are characterized and are included in organizational cybersecurity risk discussions	 Has the organization identified and documented any strategic opportunities (i.e., positive risks) that could be realized through its cybersecurity risk management activities? Are these strategic opportunities characterized in terms of their potential benefits, likelihood of success, and the resources required to pursue them? Are the identified strategic opportunities incorporated into the organization's overall cybersecurity risk management discussions and decision-making processes? Does the organization have a process in place to regularly review and update its assessment of potential strategic opportunities related to cybersecurity? Are the organization's key stakeholders (e.g., executive leadership, business units) aware of and engaged in the consideration of strategic opportunities related to cybersecurity risk management? 	
GV.RM-06: A standardized method for calculating, documenting, categorizing, and prioritizing cybersecurity risks is established and communicated	 Has the organization developed and documented a standardized methodology for assessing, categorizing, and prioritizing cybersecurity risks? Does the methodology consider factors such as asset criticality, threat likelihood, impact, and risk tolerance? Is the risk assessment methodology consistently applied across the organization? Are the results of risk assessments documented in a centralized and standardized manner? Are the risk categories and prioritization criteria communicated to relevant stakeholders throughout the organization? Does the organization regularly review and update the risk assessment methodology to ensure it remains appropriate and effective? 	

GV.RR-01: Organizational	1.	Has the organization's leadership (e.g., executive	
leadership is responsible		team, board of directors) clearly defined and	
and accountable for		communicated their responsibility and accountability	
cybersecurity risk and		for managing cybersecurity risks?	
fosters a culture that is		Do the organization's leadership team members	
risk-aware, ethical, and		actively demonstrate their commitment to	
continually improving		cybersecurity risk management through their actions	
		and decisions?	
		Has the organization established a culture that	
MINISTRY OF		encourages risk awareness, ethical behaviour, and	
MNS		continuous improvement in cybersecurity practices?	
TE STATE OF THE ST		Does the organization's leadership actively promote	
		and support cybersecurity training, awareness,	
GV.RR-02: Roles,		Has the organization documented and communicated	
responsibilities, and		roles, responsibilities, and authorities related to	
authorities related to		cybersecurity risk management?	
cybersecurity risk		Do personnel understand their assigned cybersecurity	
management are		risk management roles and responsibilities, and does	
established,		the organization monitor and enforce these?	
communicated,		Are the cybersecurity risk management roles and	
understood, and enforced		responsibilities aligned with the organization's overall	
understood, and emorced		risk management strategy and objectives?	
		Does the organization periodically review and update	
		the cybersecurity risk management roles and	
		responsibilities as needed?	
		Are the cybersecurity risk management roles and	
		responsibilities clearly defined for both internal and

GV.RR-03: Adequate resources are allocated		Has the organization defined cybersecurity risk	
		strategy that outlines resource requirements?	
commensurate with the		Are the resources (financial, personnel, technological,	
cybersecurity risk		etc.) allocated for cybersecurity risk management	
strategy, roles,		commensurate with the organization's cybersecurity	
responsibilities, and		risk strategy and policies?	
policies		How does the organization determine the appropriate	
		level of resources required to effectively manage	
		cybersecurity risks?	
		Does the organization's budgeting and resource	
		allocation process consider the evolving	
NOC.		cybersecurity threat landscape and the need for	
LILEURITY.		continuous improvement?	
		How does the organization ensure that the allocated	
		cybersecurity resources are utilized efficiently and	
		effectively?	
		Does the organization regularly review and adjust the	
		cybersecurity resource allocation to address changes	
		in risks, threats, and organizational priorities?	
		How does the organization's leadership demonstrate	
		their commitment to providing adequate resources for	
		effective cybersecurity risk management?	

GV.RR-04: Cybersecurity is included in human resources practices	 Are cybersecurity-related roles, responsibilities, and competencies incorporated into the organization's job descriptions and hiring criteria? Does the organization's hiring process include cybersecurity-focused assessments, such as background checks, skills evaluations, or security clearance verifications? Are cybersecurity awareness, training, and education requirements defined and incorporated into the organization's onboarding and ongoing professional development programs? How does the organization ensure that personnel maintain the necessary cybersecurity knowledge and skills to perform their job functions effectively? Does the organization have a process to identify and address cybersecurity competency gaps among personnel, and provide appropriate training or development opportunities? How does the organization's human resources department collaborate with the cybersecurity team to ensure alignment between HR practices and cybersecurity requirements? Does the organization have a process to manage the removal of access and privileges for departing or terminated employees in a timely manner? How does the organization's human resources practices support the development of a cybersecurity-aware culture and the retention of 	
	skilled cybersecurity personnel?	
Category	Policy (GV.PO): Organizational cybersecurity policy is esta and enforced	ablished, communicated,
Subcategory	Audit Questionnaire	Compliance Status
GV.PO-01: Policy for managing cybersecurity risks is established based on organizational context, cybersecurity strategy, and priorities and is communicated and enforced	 Has the organization established a comprehensive cybersecurity risk management policy that is aligned with its overall organizational context, cybersecurity strategy, and priorities? Does the cybersecurity risk management policy clearly define the organization's approach to identifying, assessing, and mitigating cybersecurity risks? How does the organization ensure that the cybersecurity risk management policy is communicated to all relevant internal and external stakeholders? Are there processes in place to monitor and enforce compliance with the organization's cybersecurity risk management policy? 	

Subcategory	management strategy Audit Questionnaire	Compliance Status

MOS	5. Does the policy address roles, responsibilities, and authorities related to cybersecurity risk management across the organization?	

GV.OV-01: Cybersecurity risk management strategy outcomes are reviewed to inform and adjust strategy and direction

- Does the organization have a defined process for reviewing the outcomes of its cybersecurity risk management strategy?
- 2. How does the organization identify and collect relevant data and metrics to evaluate the effectiveness of its cybersecurity risk management strategy?
- 3. Are there clear roles and responsibilities assigned for the review and analysis of cybersecurity risk management strategy outcomes?
- 4. What mechanisms are in place to gather feedback and input from key stakeholders (e.g., leadership, business units, cybersecurity team) on the cybersecurity risk management strategy's effectiveness?
- 5. Does the organization's review process consider changes in the threat landscape, regulatory environment, technology, and business objectives that may impact the cybersecurity risk management strategy?
- 6. How does the organization analyse the results of the cybersecurity risk management strategy review to identify areas for improvement or adjustment?
- 7. Are there documented procedures for incorporating the findings from the cybersecurity risk management strategy review into the organization's decision-making processes and strategic planning?
- 8. How does the organization's leadership demonstrate their commitment to the continuous improvement of the cybersecurity risk management strategy based on the review outcomes?
- 9. Does the organization have a process to monitor the implementation and impact of any adjustments made to the cybersecurity risk management strategy based on the review findings?

GV.OV-02: The cybersecurity risk management strategy is reviewed and adjusted to ensure coverage of organizational requirements and risks

- 1. Does the organization have a defined process for periodically reviewing and adjusting its cybersecurity risk management strategy?
- 2. How does the organization identify and incorporate changes in organizational requirements, risks, and threats into the review and adjustment of the cybersecurity risk management strategy?
- 3. Are there mechanisms in place to gather input from key stakeholders (e.g., business units, IT, security team, leadership) on the effectiveness and relevance of the cybersecurity risk management strategy?
- 4. What criteria or metrics does the organization use to assess the adequacy and coverage of the cybersecurity risk management strategy in addressing its requirements and risks?
- 5. How does the organization analyze the results of the cybersecurity risk management strategy review to identify areas for improvement or adjustment?
- 6. Are the adjustments to the cybersecurity risk management strategy aligned with the organization's overall risk management approach and business objectives?
- 7. What processes are in place to ensure that the updated cybersecurity risk management strategy is effectively communicated and implemented across the organization?
- 8. Does the organization provide training or guidance to support the implementation of the adjusted cybersecurity risk management strategy?
- 9. How does the organization's leadership demonstrate their commitment to the regular review and adjustment of the cybersecurity risk management strategy?
- 10. Are there mechanisms in place to monitor the effectiveness of the adjusted cybersecurity risk management strategy and make further refinements as needed

	and oversee the incorporation of cybersecurity risk
	requirements into supplier and third-party
CV CC OC. Diamaina and	agreements?
GV.SC-06: Planning and	Does the organization have a defined process for and dusting due diligence on petential symptions and
due diligence are	conducting due diligence on potential suppliers and
performed to reduce risks	other third-party service providers before entering into
before entering into	a formal relationship?
formal supplier or other	What types of cybersecurity-related assessments and
third-party relationships	checks are performed as part of the due diligence
	process (e.g., security controls, risk assessments,
	incident history)?

_	· · · · · · · · · · · · · · · · · · ·
	3. How does the organization evaluate the potential
	cybersecurity risks associated with a supplier or third-
	party before onboarding them?
	4. Are there clear criteria and thresholds established for
	determining the acceptability of cybersecurity risks
	posed by potential suppliers and third parties?
	5. Does the organization's due diligence process include
	an assessment of the supplier's or third-party's
	financial stability, ownership structure, and overall
	business continuity capabilities?
	6. How does the organization document and
	communicate the results of the due diligence process
	to the relevant stakeholders involved in the supplier or
	third-party selection decision?
GV.SC-07: The risks	1. Has the organization established a process to identify,
posed by a supplier, their	assess, and prioritize the cybersecurity risks posed by
products and services,	its suppliers and other third-party service providers?
and other third parties are	2. What criteria and methodologies does the
understood, recorded,	organization use to evaluate the cybersecurity risks
prioritized, assessed,	associated with its suppliers and third parties (e.g.,
responded to, and	threat assessments, vulnerability scans, security
monitored over the	control reviews)?
course of the relationship	3. How does the organization maintain a centralized
	inventory or database of the identified cybersecurity
	risks related to its suppliers and third-party
	relationships?
	4. Are the cybersecurity risks associated with suppliers
	and third parties integrated into the organization's
	overall enterprise risk management framework and
	risk register?
	5. What processes are in place to regularly monitor and
	update the cybersecurity risk profiles of the
	organization's suppliers and third-party service
	providers?
	6. How does the organization respond to and mitigate
	the identified cybersecurity risks posed by its
	suppliers and third parties, based on the risk
	prioritization and assessment?
	7. Are there clear roles and responsibilities assigned for
	the ongoing management and monitoring of
	cybersecurity risks related to suppliers and third-party
	relationships?
	8. Does the organization provide guidance or training to
	personnel responsible for supplier and third-party risk
	management activities?
	How does the organization's leadership oversee and
	provide direction on the management of cybersecurity
	risks associated with the supply chain and third-party
	relationships?
	10. Are there mechanisms in place to measure the
	effectiveness of the organization's supplier and third-

	party cybersecurity risk management processes and make improvements as needed?	
GV.SC-08: Relevant suppliers and other third parties are included in incident planning, response, and recovery activities	 Has the organization identified and documented the roles and responsibilities of its suppliers and other third-party service providers in its incident planning, response, and recovery processes? How are the incident response and recovery requirements communicated to and coordinated with the organization's suppliers and third-party service providers? Are there clear processes in place for suppliers and third parties to report and escalate cybersecurity incidents that may impact the organization? Does the organization's incident response and recovery plans include specific procedures for engaging and collaborating with suppliers and third parties during a cybersecurity incident? How does the organization test and validate the involvement of suppliers and third parties in its incident planning, response, and recovery exercises? Are there mechanisms in place to ensure that suppliers and third parties maintain and regularly test their own incident response and business continuity capabilities? How does the organization monitor and enforce the compliance of its suppliers and third parties with the incident planning, response, and recovery requirements? 	

GV.SC-09: Supply chain security practices are integrated into cybersecurity and enterprise risk management programs, and their performance is monitored throughout the technology product and service life cycle

- 2. How are the cybersecurity and enterprise risk management processes, policies, and controls applied to the organization's supply chain and thirdparty relationships?
- 3. Does the organization have a defined process to monitor and measure the performance of its supply chain security practices as part of its cybersecurity and enterprise risk management programs?
- 4. Are the supply chain security practices and their performance metrics aligned with the organization's overall cybersecurity and risk management objectives and key performance indicators (KPIs)?
- 5. How does the organization ensure that changes or updates to its cybersecurity and enterprise risk management programs are also reflected in its supply chain security practices?
- 6. Are there clear roles and responsibilities assigned for the integration and ongoing management of supply chain security practices within the organization's cybersecurity and enterprise risk management programs?
- 7. Are there mechanisms in place to review and continuously improve the integration of supply chain security practices into the organization's cybersecurity and enterprise risk management programs?
- 8. How does the organization ensure that the performance and results of its supply chain security practices are effectively communicated to relevant stakeholders?

GV.SC-10: Cybersecurity supply chain risk management plans include provisions for activities that occur after the conclusion of a partnership or service agreement

- Does the organization's cybersecurity supply chain risk management plan include provisions for activities that occur after the conclusion of a partnership or service agreement with a supplier or third-party?
- 2. What processes are in place to ensure the secure transfer, return, or destruction of the organization's data and assets when a supplier or third-party relationship is terminated?
- 3. Are there defined procedures for the secure offboarding of supplier or third-party access, accounts, and privileges upon the conclusion of an agreement?
- 4. How does the organization ensure that intellectual property, confidential information, and other sensitive data are protected during and after the termination of a supplier or third-party relationship?

- 5. Are there contractual clauses or agreements that outline the post-relationship cybersecurity and data handling requirements for suppliers and third parties?
- 6. Does the organization have a process to verify and validate the secure destruction or return of the organization's data and assets by suppliers and third parties upon the termination of an agreement?
- 7. Are there mechanisms in place to address and mitigate any cybersecurity risks that may arise from the termination of a supplier or third-party relationship?
